## AMENDMENT

## IN THE CLAIMS

The following Listing of Claims, in which deleted text appears struck through and inserted text appears underlined, will replace all prior versions, and listings, of claims in the application.

## Listing of Claims

1. (Currently Amended) A composition comprising:

a plurality of microparticles, a majority of which have diameters in the range of about 1 to 10 micrometers, each of which comprises a shell enclosing a gas-filled hollow core, said shell comprising an outer layer <u>composed</u> of a cross-linked amphiphilic <u>material protein</u> and an inner layer composed of a biodegradable synthetic polymer; and

a sugar.

- 2. (Original) The composition of **claim 1** in which the sugar is sucrose.
- 3. (Original) The composition of claim 1 which further comprises a surfactant.
- 4. (Original) The composition of **claim 3** in which the surfactant is a poloxomer.
- 5. (Original) The composition of **claim 1** which further comprises a water-soluble polymer.
- 6. (Original) The composition of **claim 5** in which the water-soluble polymer is a medium molecular weight polyethylene glycol.
  - 7. (Original) The composition of **claim 1** in which the gas is nitrogen.
- 8. (Original) The composition of **claim 1** in which the biodegradable polymer is selected from the group consisting of polycaprolactone, polylactice, polyglycolide, polyactide-polyglycolide copolymers, copolymers of lactides and lactones, delta-valerolactone, polyalkcyanoacrylates, polyamides, polyhydroxbutyrates, polydioxanones, poly-beta-aminoketones, polyanhydrides, poly-(ortho)esters, polyglutamic acid, polyasparatic acid and esters of polyglutamic and polyaspartic acids.

- 9. Canceled.
- 10. (Currently Amended) The composition of elaim 9 claim 1 in which the cross-linked amphiphilic protein is a cross-linked protein human serum albumin.
- 11. (Currently Amended) The composition of **claim 1** in which the cross-linked amphiphilic material protein is cross-linked with glutaraldehyde.
  - 12. (Currently Amended) A composition comprising:

a plurality of microparticles, a majority of which have diameters in the range of about 1 to 10 micrometers, each of which comprises a shell enclosing a gas-filled hollow core, said shell comprising an inner layer <u>composed</u> of polyactide and an outer layer <u>composed</u> of glutaraldehyde cross-linked human serum albumin:

glycine; and polyethylene glycol 3350.

- 13. (Original) The composition of claim 12 which is in the form of a dry cake and/or powder.
- 14. (Original) The composition of claim 12 which is in the form of an aqueous suspension.
- 15. (New) The composition of claim 1 in which the microparticles do not contain a drug.
- 16. (New) The composition of claim 12 in which the microparticles do not contain a drug.
